

This term we will enjoy taking a fascinating journey through Space. Talking of journeys, our class novel "The Jamie Drake Equation" will help us to understand more about not only the solar system, but also about ourselves, families and relationships. In Maths we will also explore planet sizes and distances. Our D & T work on textiles will link with our French work on colours as we design and make textile aliens. In Music, we'll be developing our listening and performing skills, while exploring "The Planets Suite" by Holst. Our RE work will develop a better understanding of Muslim Belief and Lifestyle and explore the importance of Easter. In Art we will develop our painting techniques, as we create Science Fiction landscapes. In PE we'll further our ability to create sequences in Gymnastics and Dance and develop our team work skills in Games. Our visit to Woolsthorpe Manor will help us to gain an insight into the life and scientific discoveries of Isaac Newton and lead to exciting challenges in English, Science and History.
